Professional Summary

Third-year Computer Science Engineering student with an interest in full-stack web development and hands-on experience building web applications. Skilled in HTML, CSS, JavaScript, and React, with foundational backend knowledge in Node.js, Express, and MongoDB. Focused on solving practical problems through clean, maintainable, and user-focused software.

Skills

Web Development: HTML5, CSS3, Bootstrap, JavaScript, React
Backend & Databases (Foundational): Node.js, Express.js, MongoDB
Tools & Platforms: Git, GitHub, Postman, VS Code, Google Cloud, Figma

Projects

SaveMyTab — Chrome Extension | *HTML, CSS, JavaScript*

- Developed a lightweight Chrome extension to simplify tab management by allowing users to save, view, and delete URLs efficiently. Implemented persistent local storage using browser APIs to retain saved tabs across sessions, helping users reduce tab clutter and improve focus during browsing and development workflows.

CV Application — Real-Time Resume Builder | *React, Vite*

- Built a real-time resume builder that updates the CV preview instantly as users edit form fields. Used controlled components and centralized state management in React to eliminate repetitive export-and-check cycles, resulting in a smoother and more intuitive resume creation experience.

SEM 4 Study Hub — Class Resource Platform | *HTML, CSS, JavaScript*

- Developed a centralized web platform to organize academic resources previously scattered across chat groups. Consolidated study materials, assignments, and weekly tasks with deadlines and download links, improving accessibility and helping classmates better manage coursework and submissions.

Education

University College of Engineering Kanchipuram
Bachelor of Engineering, GPA: 8.22 / 10   *Aug 2023 — Jul 2027*

Anderson Higher Secondary School Kancheepuram
Higher Secondary Course (HSC), GPA: 84.5%   *Sep 2021 — Apr 2023*
